Prompt, run, edit and
deploy web apps.

What do you want to build ?

Le vibe coding

Andrej Karpathy ✓

@karpathy

...

There's a new kind of coding I call "vibe coding", where you fully give in to the vibes, embrace exponentials, and forget that the code even exists. It's possible because the LLMs (e.g. Cursor Composer w Sonnet) are getting too good. Also I just talk to Composer with SuperWhisper so I barely even touch the keyboard. I ask for the dumbest things like "decrease the padding on the sidebar by half" because I'm too lazy to find it. I "Accept All" always, I don't read the diffs anymore. When I get error messages I just copy paste them in with no comment, usually that fixes it. The code grows beyond my usual comprehension, I'd have to really read through it for a while. Sometimes the LLMs can't fix a bug so I just work around it or ask for random changes until it goes away. It's not too bad for throwaway weekend projects, but still quite amusing. I'm building a project or webapp, but it's not really coding - I just see stuff, say stuff, run stuff, and copy paste stuff, and it mostly works.

Est-ce vraiment une solution pour les non techs ?

Dunning-Kruger Effect

Un non-dev découvre ChatGPT ou Cursor

leo  @leojr94_ · 3 mars

wait, you can build a SaaS for <\$50 without knowing how to code? Yup

Cursor (\$20/mo)

Vercel (\$20/mo)

Firebase (\$0/mo)

Stripe (\$0/mo)

I built Enrichlead with this stack and its already over \$100 MRR.

Il construit un SaaS ou un outil sans coder

Il se dit qu'être dev c'est fini !

leo ✓ @leojr94_ · 15 mars

my saas was built with Cursor, zero hand written code

AI is no longer just an assistant, it's also the builder

Now, you can continue to whine about it or start building.

P.S. Yes, people pay for it

Il découvre les limites des possibilités des outils

leo  @leojr94_ · 17 mars

guys, i'm under attack

ever since I started to share how I built my SaaS using Cursor

random thing are happening, maxed out usage on api keys, people
bypassing the subscription, creating random shit on db

as you know, I'm not technical so this is taking me longer that usual to
figure out

for now, I will stop sharing what I do publicly on X

there are just some weird ppl out there

Et il abandonne !

leo  @leojr94_ · 20 mars

i'm shutting down my app 😞

Cursor just keeps breaking other parts of the code

you guys were right, I shouldn't have deployed unsecured code to production

I'll just rebuild it with Bubble, a more user friendly and secure platform for non techies like me

I appreciate everyone for the support in the past 2 days

not quitting so easy
